ISQM 1 and ISQM 2 Concepts in SOQM Preparation and ISA 220 (Revised)

COURSE OBJECTIVE

For the participants to have a deeper understanding of the ISQM 1 ISQM 2 and ISA 220 (revised) Concepts that will guide them in establishing the System of Quality Management (SoQM) Manual

COURSE OUTLINE

- Understand the reason why the need to shift to ISQM 1 from ISQC 1
- Discussion of the Quality Objectives of the ISQM 1 Components
- How to perform Risk Assessment Process
- Designing the Risk Matrix (Quality Risk, Responses and Documentation)
- How to perform effective Monitoring and Remediation Process
- Guidance in establishing the firm's System of Quality Management
- Guidance in creating Policies for each ISQM 1 component
- Dynamics of ISQM 2 and ISQM 1
- Changes introduced to ISA 220 (revised)

What is ISQM 1?

Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements, replaces the IAASB's current standard, International Standard on Quality Control (ISQC) 1 which addresses firms' systems of quality control.

Under ISQM 1, firms are required to design a system of quality management to manage the quality of engagements performed by the firm. ISQM 1 applies to all firms that perform audits or reviews of financial statements, or other assurance or related services engagements (i.e., if the firm performs any of these engagements, ISQM 1 applies to managing quality for those engagements).

What is ISQM 2?

Since an engagement quality (EQ) review is a specified response designed and implemented by the firm to address quality risks, International Standard on Quality Management (ISQM) 1, Quality Management for Firms that Perform Audits or Reviews of Financial Statements, or Other Assurance or Related Services Engagements, addresses the scope of engagements subject to an EQ review. The performance of an EQ review is undertaken at the engagement level by the EQ reviewer on behalf of the firm. Accordingly, ISQM 2, Engagement Quality Reviews, addresses:

The appointment and eligibility of the EQ reviewer; and the EQ reviewer's responsibilities relating to the performance and documentation of an EQ review.

What is ISA 220 (Revised)?

Quality Management for an Audit of Financial Statements deals with the specific responsibilities of the auditor regarding quality management at the engagement level for an audit of financial statements, and the related responsibilities of the engagement partner.
